Xyjiao® L4
Modified VAE Copolymer Emulsion

Product Overview

Xyjiao® L4 is a waterborne emulsion designed specifically for bonding paper products and is widely used for bonding cake-box bases. It can also be used on wood, cotton fabric, nylon fabric, cardboard, polyurethane foam and some coated paperboard surfaces.

Parameters

Solids content:	55%
pH:	4.0-6.0
Viscosity at 25 °C:	4000-6000 mPa·s
Density at 20 °C:	Approx. 1.07 g/cm³

Storage

Store in a cool place, protected from light, at 5-30 °C. Shelf life: 9 months.

Packaging

50 kg plastic drums, 200 kg steel drums.
