Xytu® XY-WL10
Wetting and Dispersing Agent

Product Description

Xytu® XY-WL10 is a colorless or white liquid with excellent wetting, emulsifying and dispersing properties. It is widely used in household detergents, textile dyeing and printing auxiliaries, commercial and industrial cleaners, paper deinking agents, and other household and industrial detergents. It is an environmentally friendly alternative to OP-10.

Technical Specifications

Property	Specification
Appearance (20 °C)	White liquid
Color, Hazen	≤30
pH, 1% aqueous solution	5.0-7.0
Cloud point[1] (°C)	<100
HLB	13.3

1. 1% active matter in aqueous solution

Packaging

Packed in steel drums at 200 kg per drum. Flexitanks, IBCs, tank containers or road tankers may be used for packaging and transport if required.

Storage and Handling Precautions

Store Xytu® XY-WL10 sealed in containers made of steel, PE or PP; nitrogen filling of the container is recommended. Store indoors in a cool, ventilated, dry place, protected from sunlight and rain, at 15-35 °C. If stored at too low a temperature, the product may become cloudy, separate into layers or even solidify. Before use, warm as appropriate and mix the contents of the container thoroughly.

Shelf Life

When properly stored and unopened, Xytu® XY-WL10 has a shelf life of one year. After the shelf life has elapsed, it may still be used if testing confirms that it meets these technical specifications.
